Team members (Insert the name of team members here):

- 1.
- 2.
- 3.
- 4.

Team Leader:

- 1.

Teacher/Guide (if any):

- 1.

Grade:

School:

Date of Submission:

Email/phone number:

INTRODUCTION

The introduction should tell the reader what your project is about. It should be short, about 10 to 15 lines. You can try to include the following in the introduction of the report: introduce the topic of the report, explain the motivation of your project, aim of the project, purpose of the project and outline the report structure.

RESEARCH ON PRESENT STATUS OF KATHMANDU

In this section, you can present the research you have done regarding the present status of Kathmandu. This will be helpful for designing your city. The research can be done regarding following topics:

1. History
2. Administration and Government status
3. Geography and Climate
4. Demography: Population, age structure, ethnic groups, religions
5. Economy: City, Media and technology, Tourism
6. Transport: Buses, Roads, Cycling, Cable car
7. Education: Primary, Secondary, Universities
8. Culture: Heritages, Temples, Gumbas, Music, Museums
9. Recreation: Parks and open spaces, walking
10. Sport

Once you do this research, you will have the idea about the present status of our city-Kathmandu. Most of the basic research can be done in Wikipedia. However, it is necessary to include proper citation when including data. You can also include figures and graphs. Here are some of the examples of the figures you can include.

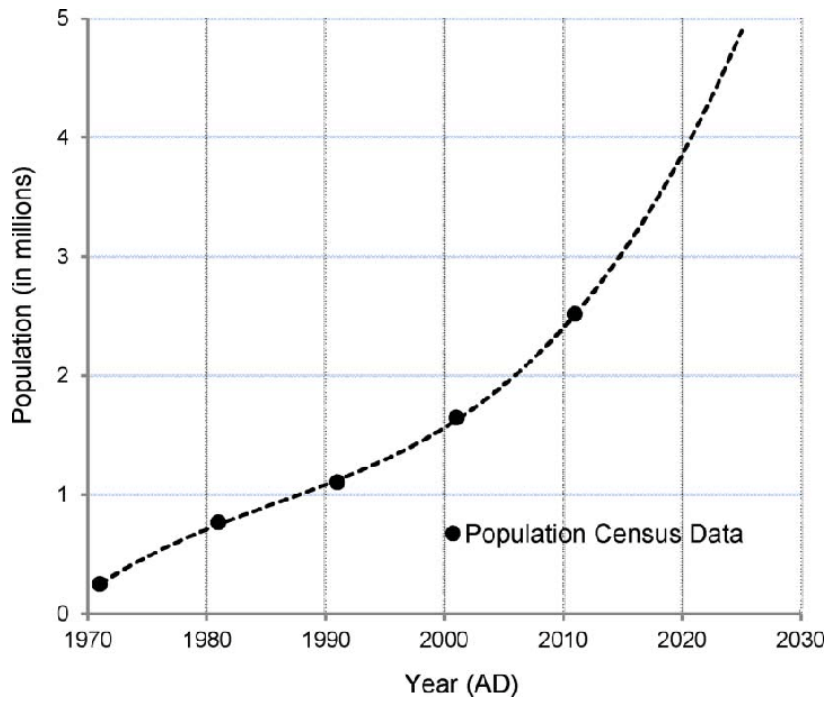

Figure 1: You can write the caption of the image here. For example for this figure: (This figure shows the population growth of Kathmandu City. Source: Ministry of Population)

Figure 2: You have to write the caption and source like in figure 1.

DESIGN OF NEW KATHMANDU

In this section, you need to include the main part of your project. This can be from 4 to 10 pages. The information in this section should be organised so that the reader can follow the development of your project. This part should flow like a story. You will therefore need to put some thought into ordering the sections and choosing concise but informative headings and subheadings.

This section should:

- presents the information from your research and your design
- organises information logically under appropriate headings
- conveys information in the most effective way for communication by means of:
 - figures and tables
 - bulleted or numbered lists

In this section, you can answer questions like how do you envision your future city of Kathmandu. You can write each plan under a new section. Some of the topics you can discuss are as follows:

1. Design and Architecture
2. Society, civilization and religion
3. Science and Technology
4. Environment and wildlife
5. Policy and planning
6. Heritage sites and conservation
7. Research, Development and Innovation
8. Road network and smart technology
9. Science parks and Museums
10. Stadiums and Business centers, etc.

CONCLUSION

The Conclusions section sums up the key points of your discussion, the essential features of your design, or the significant outcomes of your investigation. Basically, it will round off the story of the project. You need to summarise the key findings, outcome or result of the project.

REFERENCES

In this section, you need to give references to all the sources you used during the project. This is extremely useful to avoid plagiarism. Example list is as follows:

1. <https://www.welcomenepal.com/places-to-see/kathmandu.html>
2. <https://worldpopulationreview.com/en/world-cities/kathmandu-population>
3. <https://whc.unesco.org/en/list/121/>
